Fisheries Statistics 2005

Salmonid and freshwater fisheries statistics for England and Wales, 2005

We are the Environment Agency. It's our job to look after your environment and make it **a better place** – for you, and for future generations.

Your environment is the air you breathe, the water you drink and the ground you walk on. Working with business, Government and society as a whole, we are making your environment cleaner and healthier.

The Environment Agency. Out there, making your environment a better place.

Salmonid and freshwater fisheries statistics for England and Wales, 2005

(Declared catches of salmon and sea trout by rods, nets and other instruments)

This report, prepared by the Environment Agency, is one of a long-term series. It contributes to our objectives of communicating our fisheries monitoring programme

Major salmon and sea trout rivers and fisheries in England and Wales

Section 1

Introduction

This report is the Environment Agency's eleventh collation of salmon and sea trout catch statistics for England and Wales. From 1989 to 1994, these statistics were published by the National Rivers Authority (NRA). The Ministry of Agriculture, Fisheries and Food, Directorate of Fisheries Research also included them in its Data Report series between 1983 and 1988.

This report is a reference document of declared salmonid catches in England and Wales. Data from a number of Agency-operated electronic fish-counters and traps are also included in the report.

Salmon stock assessment data (including provisional catches and run estimates) are published in an annual

assessment for the International Council for the Exploration of the Seas (ICES). The ninth report in this series was published jointly by the Environment Agency and the Centre for Environment, Fisheries & Aquaculture Science (Cefas) in April 2006 (www.environment-agency.gov.uk/fish).

The catch data recorded here represent declared catches only. This document is therefore not an entirely accurate record of the total numbers of fish landed. Furthermore, the relationship between catch and stock size is not always straight forward, regardless of the accuracy of the catch data. Great care must be taken therefore in interpreting these data.

Section 2

The Environment Agency and its regions

The Environment Agency is a non-departmental public body established by the Environment Act 1995. It has taken over the functions of its predecessors, the National Rivers Authority, Her Majesty's Inspectorate of Pollution, Waste Regulation Authorities and some parts

of the Department of the Environment. The Agency came into effect on 1 April 1996.

There are 8 Agency Regions: North East, Anglian, Thames, Southern, South West, Midlands, Environment Agency Wales and North West.

Section 3

Rod and net licence catch returns

Salmon and sea trout rod licence holders are legally required to submit a full and accurate catch return to the Agency by 1 January in the following year. Commercial net and fixed engine licence holders must submit their returns within seven days of the end of each month during the fishing season.

In November 2005, for the eleventh consecutive year, the Agency sent a reminder to all holders of a salmon and sea trout rod licence to declare their catch returns. The timing of the reminder coincided with the end of

most fishing seasons. As in years 1994-2004, the effect of this reminder was marked compared with 1992 and 1993 returns, when no reminders were sent.

In an attempt to further improve reporting rates, the Agency now also routinely issues second reminders to anglers who fail to submit a return in response to the first reminder. These were issued in February 2006. We believe that the returns published here record approximately 90 per cent of all migratory salmonids caught in England and Wales.

Section 4

National overview and summary of main findings

Table 1. Summary of declared salmon and sea trout rod and net catches for England & Wales in 2005 showing % change on 2004 and the 5-year mean (2000-2004).

	2005	2004	5-yr. mean (2000-2004)	% change (+/-)	
				2005 on 2004	2005 on 5-yr. mean
RODS					
*Licences issued	34,062	32,768	29,320	+4%	+16%
*Days declared fished	186,877	191,205	171,829	-2%	+9%
Salmon caught	21,418	**27,336	17,223	-22%	+24%
Salmon released (% released)	11,983 (56%)	13,211 (48%)	8,181 (48%)	-9%	+46%
Sea trout catch	40,319	**36,100	42,539	+12%	-5%
Sea trout released (% released)	23,729 (59%)	19,489 (54%)	22,417 (53%)	+22%	+6%
NETS					
Licences issued	385	395	427	-3%	-10%
Salmon caught	16,811	16,581	33,264	+1%	-49%
Sea trout caught	23,429	26,055	36,654	-10%	-36%

* Salmon and sea trout licences only

** Amended from the 2004 report (+4 salmon, -4 sea trout on the River Conwy in Wales)

- Low flows were experienced for much of the season, however, conditions for angling improved towards the end of the salmon fishing seasons in the North of England and Wales.
- The number of salmon and sea trout rod licences issued in 2005 (34,062) increased by 16% compared with the mean of the previous five years (2000-2004).
- A total of 385 salmon and sea trout net licences were issued in 2005. This compares with 395 in 2004 and a 5-year mean of 427. Since 1985 there has been a 60% reduction in the number of net licences issued annually in England and Wales.
- The total declared salmon rod catch in 2005 (21,418) decreased by 22% compared with 2004 but increased by 24% compared with the mean of the previous five years (17,223).
- The salmon net catch in 2005 (16,811) increased by just 1% compared with the previous year and decreased by 49% compared with the 5-year mean (33,264). The North East drift net catch has reduced significantly since the introduction of the buy-out in 2003 (from a catch of 27,685 recorded by 69 fishermen in 2002 to a catch of 5,607 reported by 16 drift netsmen in 2005, a reduction of almost 80%).

Section 4

- The declared rod catch of sea trout in 2005 (40,319 fish) increased by 12% compared with 2004, however, the catch was down 5% compared with the 5-year mean.
- A total of 23,429 sea trout were declared caught by the net fisheries in 2005, a reduction of 10% compared with the 2004 catch and 36% compared with the 5-year mean.
- The average weight of a net caught salmon in 2005 was 3.62 kg. This compares with an average weight of 4 kg for rod caught salmon.
- The average weight of net and rod caught sea trout in 2005 was 1.76 kg and 1 kg; respectively. Byelaws regulating mesh sizes result in the capture of fewer small sea trout by most net fisheries.
- Catch and Release rates for rod caught salmon (56%) and sea trout (59%) were the highest recorded to date for both species. A combination of byelaws, voluntary agreements, club rules, incentive schemes and angler awareness has resulted in a dramatic increase in release rates over the past ten years.
- Net fisheries exempted from the 'spring' byelaws released a total of 29 salmon before 1 June in 2005. A further 55 salmon were released in June and July by the Avon netsmen at Mudeford.
- The river with the highest declared rod catch of salmon in 2005 was the Tyne (3,591) followed by the Eden (2,223), the Lune (1,481), the Derwent (1,386), the Coquet (1,108) and the Ribble (1,094).
- The river with the highest declared rod catch of sea trout in 2005 was the Tywi (4,698) followed by the Teifi (4,342), the Tyne (1,724), the Wear (1,497), the Dyfi (1,439) and the Lune (1,380).
- Rod catches of multi-sea-winter salmon in 2005 were 20% above the 5-year mean, whilst grilse catches were 12% above the 5-year mean.
- A number of adult salmon counts for 2005 were higher than the mean of the previous five years, and some were at the highest level recorded since 1997 (rivers Itchen and Wye).
- Adult sea trout counts in 2005 were generally at similar levels to those reported in recent years, however, the count on the Lune (10,344) was approximately double the 2004 count.
- The most successful method for salmon anglers in 2005 was spinning, accounting for 44% of the catch, followed by fly (37%) and bait (15%). 58% of the sea trout rod catch was taken on fly, 23% on spinners and 15% on bait (4% not recorded).

Section 4

Table 2. Summary of total salmon and sea trout net and fixed engine catches and weights, 2005

	Salmon		Sea trout	
	Number	Weight (t.)	Number	Weight (t.)
Caught	16,811	60.9	23,429	41.2
Retained	16,727	60.5	23,429	41.2
Released	84	0.4	0	0

Table 3. Summary of total salmon and sea trout rod catches and weights, 2005

	Salmon		Sea trout	
	Number	Weight (t.)	Number	Weight (t.)
Caught	21,418	85.8	40,319	32.9
Retained	9,435	36.0	16,590	16.9
Released	11,983	49.8	23,729	16.0

Key: (a) Separate licences for drift and T nets were issued for the first time in the northern area in 1993.
(b) Figures for half- and full-season lave nets combined.
(X) Denotes that a phase out Net Limitation Order (NLO) is in place.

Notes: Salmon caught pre 1 June released alive
A dash is used to denote months that fall entirely within the annual close season.
* Avon/Stour - all salmon released following capture

Table 6 SEA TROUT NET CATCHES - 2005 season

Key:

- (a) Days available is the total of the open season minus weekly closure periods. Part days included as full days - voluntary closure or buy-outs not taken into account
- (b) Allowable effort is number of licences X available days for NE fisheries. Allowable effort for other fisheries is number of licences X available days X 1.4 tides.
- (c) Separate licences for drift and T nets were issued for the first time in the northern area in 1993.
- (d) Catches included under Tavy and Tamar as appropriate.
- (e) Figures for half- and full-season lave nets combined.
- (f) Assume all effort utilised

nr = not recorded

Notes: The grilse/MSW split is attributed only to fish with a declared capture date and weight
The splitting model uses monthly age-weight data collected from the fish trap on the River Dee, Wales
Whole Region totals includes minor river data not otherwise included in the table

Glossary

CEFAS The Centre for Environment, Fisheries & Aquaculture Science

EIFAC European Inland Fisheries Advisory Commission

Grilse Salmon that has spent not more than one winter at sea before maturing, also known as 1 sea winter (1SW) fish

ICES International Council for the Exploration of the Seas

Migratory trout Sea trout, referred to as sewin in Wales. Migratory form of trout *Salmo trutta* (L.)

MSW Multi-Sea-Winter; a salmon that has spent two or more winters at sea before maturing

NASCO North Atlantic Salmon Conservation Organisation

Nets Instruments other than rod and line (including nets and fixed engines such as cribbs, putts, putchers, baulks, fishing weirs and traps as used for the capture of migratory salmonids)

NLO Net Limitation Order
